MANAGEMENT DISCUSSION AND ANALYSIS

1. Industry Structure & Developments :

Fruits & vegetable business in India is almost entirely in the unorganized sector. The farm sizes are small and traditionally growers either bring their produce to nearby markets/ mandis or send the produce to commission agents for sale. All the players in the supply chain: growers, commission agents, other middlemen and retailers, are totally unorganized. Only recently a few retail chains are also moving slowly and are developing formats which can generate profits. Due to the perishable nature of the commodity, the emphasis on fresh produce in retail chains is very low and this also is bought from nearby mandis only. Further, the country lacks Cold Chain infrastructure and therefore, generally during the season we see glut in the market & prices dip to unsustainable levels. All factors mentioned above lead to losses of produce.

Most of the Cold Store facilities available are used for Potato Storage. There is a gap with respect to availability of Cold Chain Infrastructure & Knowledge of Storage of other Fruits & Vegetables. This presents both a problem & an opportunity in this sector.

FHEL is one of the first companies who have invested in specialized CA Store for storage of apples. Over the last 8 years many more facilities have come up in the country.

There was no opening stock of fruit as on 1st April, 2014. During the financial year 2014-15, Company procured 8169 MT of Apples and 375 MT of other fruits (i. e. 86 MT of Kinnows, 263 MT of Mangoes and 26 MT of Grapes). Apples were primarily procured from Kinnaur & Shimla districts of Himachal Pradesh. The Company sold 4550 MT of apples and other fruits at Delhi, Mumbai, Chennai, Ahmedabad, Vijaywada, Guwahati, Kolkata and other fruit wholesale terminal markets in India during the F/Y 2014-15. As on 31.03.2015, FHEL had Closing stock of 3825 MT of Apples stored at its CA store, Rai, Sonapat.

During F/Y 2014-15, following strategic measures have been implemented by FHEL -:

- (a) Procurement at variable prices;
- (b) Monitoring of procurement supply chain to ensure no over-crowding beyond daily CA uptake capacity at Rai, thereby ensuring no losses from distress sale;
- (c) Direct sales to markets outside Delhi;
- (d) Sales at pre-determined prices;
- (e) Regular revision of sale price;
- (f) Part-letting out of available space.

With such strategic measures, procurement & sale of fruit was done at competitive prices, reducing dependence on Delhi Market, increasing the customer base across India and almost full capacity utilization of the CA facility at Rai, during the season.

2. **Strength & Weakness :**

Strengths -:

- a) Fruits & Vegetable market in India is huge (approx. Rs. 2,00,000 Crore +) & hence holds tremendous business potential.
- b) There is huge latent demand for quality produce, as country is importing large quantities of Fruits.
- c) High Margins in this trade are possible, as the differential in cost at farm gate & at retail is large.

Weaknesses -:

- (a) The sector is highly unorganized.
- (b) Knowledge of Pre Harvest care and Post Harvest Management is lacking and therefore experiments have to be conducted and so process is slow.
- (c) Retail Chains have not come up as expected and so organized distribution is not possible.
- (d) The trade is by & large on credit to stakeholders who do not have bankable credentials.

3. **Opportunity & Threats :**

Opportunities -:

- (a) Once the business is organized for one commodity, it will be easier to do so for other fruits & vegetables and thus, there is opportunity for huge upside in sales.
- (b) Since every year fruit imports are growing impressively, it shows customers are preferring quality fruit and thus organized business can make a significant contribution.

Threats -:

- (a) Traditional linkages between middlemen & grower, this affects sourcing of fruit in times of shortages.
- (b) Cheap imports or reduction in custom duty.
- (c) Non-availability of Trained Manpower.
- (d) Increasing competition from Private player who have set up CA store in last few years.

4. Segment-wise or Product-wise Performance

The Company is dealing in logistics of fresh fruits. All the activities of the Company revolve around this business and all the operations are in India. As such, there is no other reportable segment defined by Accounting Standard AS-17 related to Segment reporting.

5. Internal Control Systems and their Adequacy :

The Company has in place well defined roles, responsibilities and authorities for employees at various levels. This coupled with robust internal MIS systems, ensures appropriate information flow to facilitate effective monitoring. Adherence to these processes is monitored through frequent internal audits. The Company has internal audit system that requires internal audit firm to certify the appropriateness of internal controls in operation and checks deviations from laid down procedures. The Internal Auditor is the external firm directly reporting to management at higher level, thus ensuring its independence. Reports of internal auditor are reviewed and compliances are ensured.

17. Environment Protection and Conservation, Technological Conservation, Renewable Energy Developments, Foreign Exchange Conservation

Environmental protection and conservation, Technological conservation:

The company recognizes the vital importance of providing safe and healthy working environment and it complies with relevant statutory requirement w.r.t Occupational Health and safety within India.

The company believes sound environmental management enhances our competitive strength and benefits by contributing to the overall environment and economical well being of the communities we serve.

Measures taken for environmental protection and conservation:

The company has facility for rainwater harvesting pits at the CA Store, Rai where all the rain water collected (on roof top of the store and pavement) is re-charged to the ground.

Air pollution is arrested by proper installation of chimney of DG Sets as per the norms of Pollution control board.

Sound pollution of DG Sets is avoided by proper installation of Insulated canopy.

Disposal of sewer is made to the HSIIDC sewer treatment plant, thereby causing no ground pollution.

Water conservation is achieved by using electronic controllers for avoiding overflow of 442KL water tanks and timely detection and rectification of water leakages.

Foreign Exchange Conservation :

India imports very huge quantity of apples. In CA Store the apples can be stored for 6-8 months period. These apples can be sold during off season thereby saving precious foreign exchange for the country. FHEL procures and stores apple during the season when the supply is more than the demand and prices are low. The apples are stored in CA store and sold during off season starting November onwards till the stocks last. Due to availability of quality apples during this season the import of apples is reduced thereby saving precious foreign exchange for the country.

However, of late it is found that the fruit agents are able to get imported apples at competitive prices, which they are able to sell at higher prices to the customer, due to the customer's preference for imported produce. Due to the attractive margins in the business of imported fruits, which are freely available, the fruit agents are diverting the business to imported fruit and reducing their uptake of Indian apples. So, unless duty protection is given to Indian apples, the Indian apple farmers may be unable to market their produce at economic prices.

18. Outlook :

India is a huge country and the market for quality fruit & Vegetables is growing rapidly. India is the second largest producer of Fruits & vegetables in the world and this business is in excess of nearly Rs. 2,00,000 Crores. Out of this nearly 18% worth of fruit & vegetables perish due to lack of Cold Chain Infrastructure and lack of organized distribution and marketing. Due to the nature of business and perishable nature of the commodity, it is indeed a big challenge to organize it and generate profits. The company has been able to make substantial improvements in the business each year. Our main focus at present is on apples coming from Himachal Pradesh. The growing areas of Himachal Pradesh are dependent on rainfall for crop. Further, there are risks of hail storm during the summer months April – June which effects crop. Otherwise Himachal Pradesh produces apples worth approx Rs.2,000 Crore per annum. The apple from Kinnaur Command premium price and company has a substantial presence in this area. The demand for Shimla & Kinnaur apples is expected to remain good.

19. Risks & Concerns :

FHEL has identified the possible risks arising in the operations and other key areas of the company and also formulated risk management /mitigation measures.

Major risks involved are :-

- (i) Dependence of business on weather conditions, particularly rainfall. It can be adversely impacted with hail storm during pre-harvest period.
- (ii) Un-organized nature of trade.
- (iii) Un-economical small farm holdings
- (iv) Competition from cheaper imports
- (v) Lack of trained manpower
- (vi) Local Competition
- (vii) Imports

Implementation of risk mitigation/management measures is reviewed by Audit Committee and Board periodically.

20. Corporate Social Responsibility (CSR)

Under CONCOR/FHEL's CSR and Sustainability initiative, a project on CSR and Sustainability was implemented by The Energy and Resources Institute (TERI) in Shimla, Kullu and Kinnaur districts of Himachal Pradesh covering activities like training and capacity building, exposure visits, distribution of apple planting materials, water solutions etc, to more than 1500 beneficiaries. Being a loss making entity, FHEL is not mandated to incur any expenditure towards CSR in accordance with the provisions of Companies Act, 2013 and rules made thereunder.

- (i) The details of various measures taken during the year under various heads of Energy Conservation are as follows :-

1. POWER CONSUMPTION FOR REFRIGERATION AND AIR CONDITIONING, AUXILIARY UNITS

- (a) Energy Saving Screw Compressors and Chillers have been installed and used for refrigeration of CA Store, Processing Area Air Conditioning and Office building. Also, Variable frequency drives (VFDs) have been used for Refrigeration compressors, Cooling coil fan motors (312 motors), Air cooling unit fan motors for Air-conditioning (51 motors), Cooling tower fan motors (6 motors), Carbon dioxide scrubbers (12 motors).
- (b) Cooling towers and Condenser water pumps are operated based on ambient conditions and actual requirement.
- (c) Optimization of Running of refrigeration compressors and air conditioning system.
- (d) Cleaning and replacement of air filters for air compressors, nitrogen generator compressors and diesel generators.

2. Lighting :

Energy Conservation in lighting is achieved by use of Energy efficient tube lights for entire plant, use of CFL's for office building, use of electronic ballasts, cleaning of light fittings for optimum utilization of light illumination and lighting voltage optimization. During the year special care was taken to ensure that lights operated only in areas where it was required. Area identified and implemented were External lighting, utility area, corridors, sorting hall, packing hall, machine room, and office building.

3. Heat energy :

Loss/Gain of heat energy in the cold room is prevented by optimum thermal insulation thickness for stores and cladding for pipe lines for minimal heat loss/ gain, cleaning of chilled water tubes, condenser water tubes and Minimum Infiltration of external Air to Cold Store and processing area by proper sealing of incoming and exit gates.

4. Fuel oil:

By regular and proper preventive maintenance and calibrations of components of diesel generators, minimum fuel consumption is ensured. By putting off Nitrogen Generator plant, forklifts and stacker charging, the load on the DG is reduced and these equipment are run when power supply is available from electricity Boards.

5. Water for cooling towers and processing :

Water conservation is achieved by use of electronic controllers for avoiding over flow for 442 KL water tanks, re-use of processed water, waste water and fruit washing water for horticulture and timely detection and rectification of water leakages.

6. Battery chargers for material handling equipments and other purposes:

Chargers are installed with automatic low current charging devices for energy saving.

Impact of measures taken for Energy Conservation

Unit consumed per MT in 2014-15 is 50.85 KWH as compared to 52.55 KWH in 2013-14.

(ii) The steps taken by the company for utilizing alternate sources of energy:- NIL

3. (iii) The capital investment on energy conservation on equipments:- NIL

B. Technology absorption

(i)	Efforts made towards technology absorption.	As of now our focus has been in doing as many trials as possible to store different fruits and vegetables with this new technology, so that utilization of the Store is maximized. Thus many trials as mentioned above have been done and these have been quite successful. Due to the same the utilization has increased substantially.
(ii)	The Benefits derived like product improvement, cost reduction, product development, and import substitution.	All fruits and vegetables storage is helping the company in offering these commodities for sale in off season. This is increasing consumer satisfaction import substitution and more remuneration prices for produce to farmers.
(iii)	In case of imported technology (imported during the last 3 years reckoned from the beginning of the financial year); following information may be furnished (a). Details of Technology imported (b). Year of import (c). Whether the technology been fully absorbed (d) If not fully absorbed, areas where absorption has not taken place and reasons therefore.
